See the exact words AI used to cite you

Published on May 21, 2026

Table of Contents ▼

There's a free Microsoft report that shows you the exact phrases AI used to cite your site. Almost nobody opens it.

It's called **AI Performance**, inside **Bing Webmaster Tools**. Free, and you can import your site from Google Search Console in two clicks.

Open it and go to **Grounding Queries**: the actual phrases AI searched to pull your pages into an answer. Not the keywords you targeted - the words it really used.

BING · AI PERFORMANCE

The free report showing what AI sees about you
